

## Innovative Lubrication Solutions for Every Industry

Established over three decades ago in Europe, Memolub, Belgium has built a legacy as a global innovator in automatic lubrication technology. Renowned for its robust engineering and user-centric designs, Memolub systems are trusted across more than 70 countries and a spectrum of industries—from heavy manufacturing and mining to food processing and precision engineering. The brand's commitment to advancing maintenance practices, reducing operational risks, and supporting sustainable industry has earned it a reputation for excellence and reliability worldwide.

Memolub India, recently established to meet the evolving needs of the domestic market, is dedicated to delivering reliable, efficient, and sustainable solutions to the diverse industrial landscape of India. At the helm, Memolub India is led by a team of highly trained and experienced engineers who collectively bring over 60 years of expertise in the field of Automatic Lubrication solutions. As an affiliate of the globally renowned Memolub brand, we bring world-class lubrication expertise and innovative technology to manufacturing, process, and infrastructure sectors across the country.

Memolub India offers a comprehensive range of automatic lubricators and lubrication systems, each engineered to meet the varied needs of modern industry. Our flagship products include:

- Memolub EM, Memolub ONE, Memolub HPS: High-performance, battery-operated single and multi-point lubricators, delivering consistent lubrication over long periods.
- Memolub EPS: Electrically driven lubricators for applications requiring precise control and higher lubricant volumes.
- Memolub VISIO, Memolub PLCD: Programmable lubrication systems compatible with plant-wide automation and monitoring solutions.
- Centralized Lubrication Systems: Newly developed solutions engineered and manufactured in India, designed for large-scale and complex applications, ensuring complete and automated lubrication coverage across all types of industrial equipment.

Visit [www.memolub.com](http://www.memolub.com) for more details.

Memolub India's solutions are designed to add value across the entire spectrum of industry segments. Our expertise extends to, but is not limited to, the following areas:

- **Manufacturing & Heavy Industry:** Steel plants, cement factories, machine shops, automotive manufacturing, textiles, and foundries.
- **Power Generation:** Thermal, hydro, wind, and solar power plants, ensuring uninterrupted operation of turbines, generators, and ancillary equipment.
- **Mining & Quarrying:** Robust solutions for the harsh environments of mining and materials processing operations.
- **Food & Beverage Processing:** Food-grade lubrication systems meeting stringent hygiene and safety standards.
- **Pharmaceuticals & Chemicals:** Precision lubrication for process-critical machinery in regulated environments.
- **Pulp & Paper:** Automated lubrication for demanding paper machines, presses, and conveyors.
  
- **Infrastructure & Building Services:** Solutions for HVAC, escalators, elevators, and building maintenance.
- **Transportation & Logistics:** Lubrication for conveyor systems, cranes, automated storage, and retrieval systems.
- **Electronics & Precision Engineering:** Cleanroom-compatible lubricators for high-precision applications.
- **Agriculture & Food Processing:** Automated solutions for farm machinery and food production lines.

## Why Choose Memolub ?

1. **Proven Technology:** Memolub is a global leader in automatic lubrication, with decades of expertise and innovation. Our products are field-proven across thousands of installations worldwide.
2. **Customization & Flexibility:** We recognize that every industry and application has unique requirements. Our technical team works closely with you to design bespoke solutions, ensuring perfect compatibility with your processes.
3. **Reliability & Performance:** Our lubrication systems are engineered for durability, accuracy, and consistency—delivering the exact amount of lubricant required, exactly when needed.
4. **Safety First:** Automated lubrication reduces manual intervention, minimizing safety risks and exposure to hazardous areas.
5. **Environmental Responsibility:** Memolub systems minimize lubricant waste and environmental contamination, supporting your sustainability goals and compliance with environmental regulations.
6. **Easy Installation & Maintenance:** Simple to install and operate, our systems are designed for minimal maintenance, reducing both downtime and lifecycle costs.
7. **Comprehensive Support:** From consultation and system design to installation, training, and after-sales service, our team ensures smooth implementation and long-term reliability.

## Benefits to Your Operations

By adopting Memolub India's lubrication solutions, customers benefit from:

- Extended equipment life and reduced breakdowns
- Lower maintenance costs and labour requirements
- Consistent, optimal lubrication for every application
- Enhanced workplace safety and reduced manual intervention
- Improved productivity and equipment uptime
- Compliance with industry standards and certifications
- Reduced lubricant consumption and waste
- Support for predictive and preventive maintenance strategies

## Our Process

1. Consultation: We begin by understanding your operations, challenges, and goals, conducting site surveys and equipment audits as needed.
2. Solution Design: Our engineers recommend the optimal Memolub system and configuration, tailored to your specific machinery and processes.
3. Installation & Training: Our field team installs the system and trains your staff in operation and routine maintenance, ensuring confident adoption.
4. Ongoing Support: We provide comprehensive after-sales service, spare parts availability, and technical assistance for the life of your equipment.

### **DISTRIBUTOR:**

402, 4th Floor, Bezzola Commercial Complex,  
V.N. Purav Marg, Sion-Trombay Road,  
Chembur, Mumbai – 400071,  
INDIA.
